### **Metuchen , NJ “SuperChannel” Picks TelVue’s TVTN Service**

*Key Jersey Access Group (JAG) Member Cites TVTN’s Patent Pending WEBUS System as Major Factor in Decision*

Edison, New Jersey, May 19, 2005 – On the heels of its recent launch in Washington Township, New Jersey, TelVue Corporation (OTC: TEVE.OB) announced it has secured a Letter of Intent to launch its TelVue Virtual Television Networks (TVTN) service in Metuchen, New Jersey. Metuchen, a founding member of the prestigious Jersey Access Group (JAG), manages a well programmed “SuperChannel.” The “SuperChannel” designation is given to government and educational access channels considered to be advanced in their video programming and on air presentation. A significant number of JAG members have elevated their access channels to this level.

In addition to professionally produced station IDs, customized PSAs and localized weather and traffic information, TVTN will provide Metuchen with an advanced version of its patent pending Web Updating System (WEBUS). The system will enable station managers to efficiently post school news, municipal announcements, and emergency information. In addition, Metuchen’s “Super User” status will empower station managers with features and functions that are not available to the average TVTN affiliate.

“Signing Metuchen marks a significant milestone for TVTN,” said Joseph M. Murphy, President and CEO of TelVue Corporation. “As a founding JAG member, their confidence in our programming service sends a strong message to other members of that influential organization.”

TVTN ([www.tvtn.tv](http://www.tvtn.tv)) dramatically improves the way communities see local access programming by efficiently disseminating news people can use; broadcasting information in an eye- and ear-catching format; and rotating “fresh” information while keeping content lively.

TVTN is capable of upgrading the look and feel of thousands of Public, Education and Government (PEG) channels around the country simultaneously.

With TVTN, these channels can transform from text-based bulletin boards to multimedia outlets complete with full-motion video, graphics with voice-over, video-based public service announcements, local weather and traffic, and instant emergency alerts.

TelVue Corporation is a public company trading on the OTC Bulletin Board as TEVE.OB. This announcement contains certain forward-looking statements that are subject to risks and uncertainties. Such statements reflect management’s current views and are based on certain assumptions. Actual results could differ materially from those currently anticipated as a result of a number of factors, including, but not limited to, the risks and uncertainties discussed in the TelVue Corporation’s reports filed with the Securities and Exchange Commission.
