TelVue Corporation launches WEBUS Inside™

Software release enables the complete integration of digital broadcast servers with a multi-user community bulletin board system.

February 6, 2009 (Mt. Laurel, NJ) – TelVue Corporation announced the release of WEBUS Inside™, a web-based, multi-user video bulletin board system that directly integrates with TelVue Princeton™ broadcast servers. According to the company, WEBUS Inside™ is a software plug-in to the TelVue Princeton™ broadcast server line that allows hyperlocal broadcasters to easily create, update and feature video bulletin board messages directly on their channels and websites. WEBUS Inside™ provides a bulletin board system natively on TelVue Princeton™ broadcast servers including multi-channel configurations without any additional hardware required.

Advanced workflow features incorporated into WEBUS Inside™ include automatic pagination and message scheduling with expiration dates, day parts, intervals (for example “on the 5s”) and emergency interrupt messages. WEBUS also supports a trusted and moderated multi-user workflow as well as TelVue's WEBLINX™ plug-in that allows bulletin board messages to be displayed simultaneously on a station's or organization's website.

Commenting on the WEBUS Inside™ release, Jesse Lerman, TelVue President and CEO said, “By integrating our WEBUS™ bulletin board technology into our TelVue Princeton broadcast servers on a single hardware platform, we offer hyperlocal broadcasters significant workflow and cost advantages. Cost is an important factor as many stations and towns are affected by today's challenging economic conditions. Incorporating bulletin board on a true broadcast platform also provides tighter timing and highly reliable video integration that are typically lacking in other digital signage systems often used for local broadcast message board.”

About TelVue Corporation

TelVue Corporation is a broadcast technology company that helps hyperlocal television channels achieve professional results at affordable prices. TelVue achieves these results by using our proprietary digital media software and today's open technologies to simplify professional broadcast equipment and workflow. As a result, our customers benefit from improved programming, reduced costs and are better positioned to meet the new challenges of a rapidly changing industry.

TelVue Corporation is a public company trading on the OTC Bulletin Board as TEVE.OB. Cable television pioneer and philanthropist H.F. “Gerry” Lenfest is chairman of the company's board of directors.
