TelVue Corporation releases PEG.TV™ Version 2.0

Version 2.0 player includes enhanced navigation, video chapter support, keyword search and related item hyperlink options.

April 6, 2009 (Mt. Laurel, NJ) – TelVue Corporation (OTC.BB: TEVE) announced today the availability of its new and improved TelVue PEG.TV™ version 2.0 player. PEG.TV™ is TelVue's Internet based Video-on-Demand and Live Streaming Video service developed specifically for community and local government broadcasters. According to TelVue, the PEG.TV™ service enables local organizations to easily add their important video programming, such as meetings, events, sports and information to their website without investment in technology and infrastructure. PEG.TV™ provides customers with complete control over how their content will look on the web through a searchable, branded Flash video player.

The company reports the PEG.TV™ Version 2.0 player is now equipped with enhanced navigation, video chapter support, a keyword search engine and related item hyperlink options. PEG.TV™ viewers can now quickly jump directly to the desired chapter of a long video, such as a council or school board meeting with out delays or buffering. A keyword driven search feature also enables the viewer to easily find specific video content on the PEG.TV player.

Commenting on the PEG.TV™ Version 2.0 release, Paul Andrews, TelVue SVP, Sales & Marketing said, "Our PEG.TV™ service is an incredibly easy way for organizations to add Internet video to their website. PEG.TV™ version 2.0 builds on PEG.TV's early success by adding important new features and capabilities to both the Flash-based video player and content management system. I think PEG.TV™ is now an even more attractive service to communities looking to further reach out to their constituents with Internet video. Groups interested in TelVue's PEG.TV™ can view our online player demo at <http://yourtown.peg.tv>."

About TelVue Corporation

TelVue Corporation is a broadcast technology company that helps hyperlocal television channels achieve professional results at affordable prices. TelVue achieves these results by using our proprietary digital media software and today's open technologies to simplify professional broadcast equipment and workflow. As a result, our customers benefit from improved programming, reduced costs and are better positioned to meet the new challenges of a rapidly changing industry. TelVue Corporation is a public company trading on the OTC Bulletin Board as TEVE.OB. Cable television pioneer and philanthropist H.F. "Gerry" Lenfest is chairman of the company's board of directors.
