

ALL-IN-ONE

HIGH DEFINITION CAMPUS BROADCAST PLATFORM

Creating The Next Generation Of High Definition Campus TV Broadcast

Innovation in digital broadcast technology, now makes it easier and more cost-effective than ever for Colleges and Universities to launch a High Definition Campus Broadcast channel. CampusOneHD empowers students with a unique, media-rich voice, and enhances campuses through:

- Student HD Broadcast TV Station and Internet
- Communication to Administration, Faculty and Student Body
- Cable and Internet Televised Events and Classroom Lectures
- Media Curriculum and Digital Broadcast Training
- Digital Signage and Life Safety Communications

One Cost-Effective Solution Powers All Your Campus Broadcast Needs

campusoneHD EQUALS

HIGH DEFINITION BROADCAST

ORIGINATION, COMMUNICATION & RICH MEDIA CAMPUS EDUCATION

Easy-To-Implement & Maintain, Key Features & Benefits Include:

- **All-in-one solution for campus HD, IP and coax broadcast** needs that is very gentle on the budget
- **Web-based graphic user interface** for easy installation and 'hands off' remote operation
- **Live broadcast and streaming** of events and lectures across campus cable TV and Internet for integrated tele-learning and improved campus outreach
- **Digital Signage** solution enables advanced Life Safety communications and fosters campus spirit
- **Share programming** with other institutions to expand programming availability

Sample Applications:

- Media Curriculum: Student HD Television Channel
- Health and Wellness Center: Vaccination schedule and outbreak prevention education
- Athletics: Replay events in HD to promote campus spirit and promote upcoming event sales
- Academic Departments: Live streaming of acclaimed guest speakers with scheduled re-broadcasts on the television system, or Internet based video on demand
- Student Government: Promote and broadcast meetings and events to entire faculty and student body on and off campus with Digital Signage, campus broadcast and Internet
- Public Safety: Life Safety notifications via Digital Signage and campus broadcasts

 We knew going digital would reap benefits for us, but the immediate impact the TelVue campus broadcast platform has had on our operations has completely floored us. We've more than **quadrupled the programming** our University offers across three cable stations, while **cutting our labor costs in half**. We only wonder why we waited so long to make the move to TelVue. 

- Brandon Smith, Television Services,
Northern Arizona University

TelVue Powers Campus Broadcast For:

TelVue Corporation is a broadcast technology innovator and leader in community and hyperlocal television broadcast delivery. The company's products and services enable our customers to dramatically streamline and enhance their channel programming and delivery, reduce costs, and be better positioned to meet the new challenges of a rapidly evolving industry. TelVue's professional quality equipment and services include; digital video servers, broadcast automation and workflow applications, live internet streaming, video on demand, and multi-user digital signage.
